# Health is a dynamic process

To be healthy means to be in a dynamic process between polarities which can bring us out of the balance. For example,

- for the soil find the balance between too much C and too much N (conv. Agriculture)
- for the plants between too much vegetative process and too much generation process
- for the animals ?
- and for the farm itself as entity ?

LA DIVERSITÉ BIOLOGIQUE

Bats, pigs and  
humans

Why  
deforestation  
enhances the  
infectious  
diseases ?

How can we  
develop many  
intimate  
relationships  
on the farm like  
in the forest ?

# Health and resilience on the farm ?

- Physical level: diversity of landscape elements and functions.

Agroecosystem

- Life level: vitality of the soil, plants and animals
- Astral level: connections. Giving and taking.

Farm organism

- I level: Genius loci.

Farm individuality

Leurs forêts villageoises

# From natural to cultural biodiversity

- Create a new organism between nature and culture
- Create new relationships between the living beings
- Develop the natural diversity and the cultural
