

Encounter with plants

Webinar online course in 3 sessions with Jean-Michel Florin

A pilot project on preparation plants

II The whole plant and the metamorphosis of the plant

Exercise session II

1. The whole plant

- Draw the whole plant in black pencil (2B on white A4 paper preferably)
- Draw/Describe its shape in space (vertical, spreading, etc.), its size, the colors of the different organs from bottom to top

2. The metamorphosis of the plant

- Draw/describe phases of plant development e.g. rosette, stem emergence, bolting, budding, flowering, fruiting, etc.

Tip: Try to find several specimens of the same plant at different stages (more advanced in the sun, less advanced in the shade).

3. Other observations

- Draw/describe also the close surrounding like presence of insects and animals on the plant, etc.

The exercises will be discussed in the next session. Please send your completed exercises in advance to Jean-Michel Florin: jean-michel.florin@goetheanum.ch
