

# CROSS FLOW FILTRATION – A SUITABLE TECHNIQUE FOR DEMETER WINEMAKING?

International Video Discussion

**New Date: June 1st 2021**

# INVITATION

Dear Demeter winegrowers,

Compared to other products wine is a very international product. The development of a mutual international quality understanding for the production and processing of wine is therefore fundamental for an appreciative perception of each other within the Demeter community and the outward strengthening of the Demeter brand.

In preparation of the BFDI Member's Assembly in June, we want to open the space to an international discussion of the current ICO motion to allow crossflow filtration for Demeter winemaking.

We'd be glad to exchange pro and con arguments with you in a video discussion via ZOOM at June 1<sup>st</sup>.

The session will take time from

- Pacific Daylight Time (PDT) 10:30 AM – 01:00 PM
- Central European Summer Time (CEST) 7:30 – 10:00 PM
- New Zealand Standard Time (NZST) 5:30 – 8:00 AM
